## SUMMARY

*Innovative Frontend Engineer with a global perspective and a passion. Proficient in JavaScript, TypeScript, and Vue. Currently exploring React and eager to apply my learnings to future projects. Passion for learning new things and willingness to take on challenges. Eager to bring creativity and technical expertise, with problem-solving and analytical abilities and strong communication and collaboration skills.*

*Eager to transition into backend development with a strong foundation in Node.js and Express.js, leveraging my skills to contribute to innovative backend solutions.*

## WORK EXPERIENCE

### **Deliverect - Amersfoort** (March 2024 – Present)

#### Frontend Software Engineer

- Developed and maintained a performance analytics dashboard from scratch using React and Next.js, visualizing key financial KPIs and managing dynamic data tables to support client decision-making.
- Led frontend architecture and implementation as the sole frontend developer, collaborating closely with a team of 5 backend developers, a product manager, and a designer to solve architectural challenges and build an in-house component system.
- Designed and implemented flexible user management features for admin settings, ensuring scalability and adaptability, while independently making UI/UX decisions in the absence of a designer during the project's early stages.

### **Atabix Solutions - Amsterdam** (August 2020 – March 2024)

#### Frontend Software Engineer

- Collaborated on the construction of a cutting-edge GPS tracking system adopted by multinational corporations, contributing to streamlined global operations and enhanced supply chain management.
- Developed responsive designs with web accessibility in mind using TypeScript and Vue.js, consistently meeting and exceeding customer design requirements.
- Achieved a 100% improvement in claims handling efficiency through successful implementation of a booking system aligned with Dutch government standards.
- Led a comprehensive component library with colleagues, resulting in a notable 20% or more increase in efficiency for internal development processes.
- Developed fully accessible online forms, ensuring 100% compliance with web accessibility standards, enhancing user experience and inclusivity.

### **Other Jobs** (June 2011 – March 2020)

- Leveraged adaptability to work in diverse environments, enhancing cultural understanding and team collaboration.
- Applied problem-solving skills to handle challenging situations, ensuring smooth operations in various industries.
- Led a team of 15-25 individuals as a Team Lead in a telecommunications multinational.

## ACCOMPLISHMENTS & SKILLS
